

Why Ovation?

We are an organization founded by physicians. As industry professionals we saw the cost of health insurance soar, with businesses and individuals paying most of the cost through coinsurance and deductibles.

We analyzed these issues and found innovative ways to provide comprehensive health care that is affordable, effective, accessible, and easy to navigate for employers and members.

We lower costs by combining the advantages of telemedicine, a robust pharmacy program, and a growing network of physicians with fixed rates. We do this by direct contracting and expanding relationships with additional provider networks.

Our self-insured and underwritten level funded plans are re-insured to mitigate catastrophic events.
